DETAILED ACTION

I. Rejection of claims 18,19,21-23,26-37,39-41 under 35 USC 103(a) over JP '910 will be maintained in light of amendment filed 12/03.

Applicant argues that Sumitomo does not teach nitrocellulose as a moisture-retaining agent and there is no evidence on record which teaches that nitrocellulose is a moisture-retaining agent. Applicant argues that Sumitomo also does not teach an amount of nitrocellulose for his invention. Examiner argues that instant specification page 5 line 26 –page 6 line 4 defines moisture-retaining agent as cellulosic hydrophilic derivative. Nitrocellulose fits this definition. In a claim to a composition, a statement regarding the composition's intended use (moisture-retaining agent) has no patentable significance. Applicant argues that where the prior art discloses all the ingredients of the composition claims except for the instant amounts, Applicant must show the criticality of the amounts.

Applicant argues that Sumitomo vegetable present in an amount of 30% by weight which is considerably less than the minimum amount required by the instant invention. Examiner argues that 40% vegetable meal is not significantly different from 30% vegetable meal in the absence of unexpected results.

Applicant argues that the intended use for the Sumitomo's composition is applied to ants; whereas, the instant composition is applied to crops and soil. In a claim to a composition, a statement regarding the composition's intended use has no patentable significance.

Examiner maintains that with respect to amounts and particle sizes, one having ordinary skill would have been expected to optimize those parameters during routine experimentation. One would have been motivated to do this in order to develop the most effective composition.

Claim Objection / Allowable Subject Matter

Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the vegetable meal as being corn meal. Claims 42-69 are allowable. The prior art does not disclose instant composition comprising cellulose and the instant compounds of claims 51-69. Also, see reasons for allowance in office action dated 7/11/03.
